COVID-19 Survey Series: Vaccine Hesitancy

Released May 11, 2021

Older Pennsylvanians were the most certain about receiving the coronavirus vaccine.

Only 13.8% of respondents 65 and older indicated that they did not plan to get vaccinated.

Residents of the Northwest, Northeast, and Southcentral Department of Health regions were the most reluctant to get the vaccine.

Almost a third of respondents in these three regions did not plan to get the vaccine.
